

# Using MATLAB and Simulink in the Life Sciences

Tuesday, March 13, 2007  
12:30 – 4:00 p.m.

This technical session will show how the MATLAB and Simulink products are used as a flexible platform for technical computing and application development in life science and biomedical research.

**Where:** 2100 West Harrison Street, Main Auditorium, Chicago IL

**Register:** Please go to: [www.mathworks.com/seminars/bitmap](http://www.mathworks.com/seminars/bitmap)

Presenter: Brian Madsen, Senior Applications Engineer

## Agenda

### **MATLAB Development & Deployment Platform in Life Sciences**

This technical session will discuss and demonstrate:

- Solving computational problems
- Empower researchers to conduct experiments and publish results
- Model biophysical processes and biochemical pathways

**Sponsored by:**
